

RESOLUTION NO. R-2018-215

A RESOLUTION TO OF THE CITY COMMISSION OF THE CITY OF HOLLYWOOD, FLORIDA, EXPRESSING THE CITY OF HOLLYWOOD'S OPPOSITION TO OFFSHORE DRILLING ACTIVITIES, INCLUDING SEISMIC AIRGUN BLASTING.

WHEREAS, the United States government has expressed interest in opening the Atlantic Ocean and Eastern Gulf of Mexico to offshore oil and gas development and exploration, including risky methods such as seismic airgun blasting; and

WHEREAS, seismic airguns fire intense blasts of compressed air, one of the loudest manmade sounds in the ocean, every 10 to 12 seconds for days, weeks, or months on end; and

WHEREAS, seismic airgun noise has been shown to harm and injure dolphins, whales, endangered sea turtles, fish, and other marine life; and

WHEREAS, exploratory and commercial drilling, extraction, and transportation of offshore oil and gas resources pose a significant risk of oil spills and chronic leakage; and

WHEREAS, eventual offshore drilling may require significant onshore infrastructure, such as pipelines or refineries, which would harm the character of the coast; and

WHEREAS, offshore drilling activities pose threats to treasured vacation destinations on Florida's Coasts, which are of intrinsic economic value for numerous industries, provide essential nursery habitats for recreational and commercially important fisheries, and act as natural buffers from storm surge and hurricanes; and

WHEREAS, the City recognizes that the tourism and fishing industries, which depend on a healthy and vibrant coastal environment, both serve as major economic drivers benefiting the current and future residents, property owners, and visitors to Florida; and

WHEREAS, the City endeavors to be a good steward of the state and region's environment and its resources; and

WHEREAS, exploration and development of oil and gas resources off the coast of Florida will not effectively address the long-term energy needs of our country; and

WHEREAS, the City recommends that it would be more economically and ecologically responsible to pursue non-polluting sources of renewable energy such as solar and wind, that pose less risk to the coastal environment and economic health before using uncertain methods of seismic airgun blasting for offshore oil and gas deposits.

NOW THEREFORE, BE IT RESOLVED BY THE CITY COMMISSION OF THE CITY OF HOLLYWOOD, FLORIDA:

Section 1: That the foregoing "WHEREAS" clauses are ratified and confirmed as being true and correct and are incorporated in this Resolution.

Section 2: That offshore oil and gas drilling and exploration, including seismic airgun blasting, will put Florida's environment, beaches, marine resources and local economies at risk; therefore the City Commission expresses its opposition to these activities and urges the federal government not to pursue such practices off Florida's coast.

Section 3: That the City Clerk is directed to transmit a copy of this Resolution to the City of Hollywood's Federal Representatives, the Governor of the State of Florida, and the City's State Legislators.

Section 4: That this Resolution shall be in full force and effect immediately upon its passage and adoption.

PASSED AND ADOPTED this 3 day of July, 2018.

ATTEST:

PATRICIA A. CERNY, MMC
CITY CLERK

JOSH LEVY, MAYOR

East Coast opposition

Currently, more than 250 East Coast municipalities and over 1,700 elected local, state and federal officials have formally opposed offshore oil and gas drilling and seismic airgun blasting. Numerous fishing and tourism interests, including local chambers of commerce, tourism and restaurant associations, and an alliance representing over 41,000 businesses and 500,000 commercial fishing families from Florida to Maine, also oppose oil exploration and development in the Atlantic.

Additionally, the New England, South and Mid-Atlantic Fishery Management Councils, the Department of Defense, NASA, and the Florida Defense Support Task Force have all expressed concerns about the compatibility of their activities with ongoing oil and gas operations.

Opposition to seismic airgun blasting and Atlantic drilling has been mounting for years, and the issue will continue to be significant for people along the East Coast. Especially since nearly 1.5 million jobs and over \$108 billion in gross domestic product rely on healthy ocean ecosystems, mainly through fishing, tourism and recreation.
