Bill,

SFA submitted this comment to the President today to assure you we are honestly opposed to the seismic test and oil drilling off the east coast. The reply from the White House follows. Much more has to be done of course, but I wanted to make sure you had something in writing to know where we stand. If you have contact with the anglers, I suggest you get them to weigh in on this as well.

Mr. President:

On behalf of the seafood industry represented by our 63 year old fisheries association, we implore you to prevent the seismic testing slated for the east coast of Florida. There is no upside for injuring Right whales and dolphins or putting our white beaches and tourism industry in jeopardy. The price of oil is falling because we are almost self-sufficient and there is a crying need for alternative forms of energy for the world. Please do not allow seismic testing in the South Atlantic region.

Respectfully,

Bob Jones

Southeastern Fisheries Assn.
