September 6, 2019

The Honorable Nancy Pelosi  
Speaker of the House  
U.S. House of Representatives  
H-232, U.S. Capitol  
Washington, DC 20515

Dear Madam Speaker

On behalf of more than 4,000 businesses, we are writing to express our strong support for H.R. 1941 and H.R. 205, the Coastal and Marine Economies Act and the Protecting and Securing Florida's Coastline Act of 2019 respectively. These bills would permanently protect our coastal resources - and the vibrant ocean economies that depend on a clean and healthy ocean - from new offshore drilling in the Atlantic and Pacific Outer Continental Shelf planning areas as well as the eastern Gulf of Mexico. We urge you to ask the President to withdraw his plans to expand drilling and to vote yes on H.R. 1941 and H.R. 205.

As you know, the Trump administration recently signaled a delay in his plans to expand offshore drilling. Nonetheless, the proposal to open nearly all of our coasts to drilling is still on the table and planning to open our coasts could resume at any time.

Since February of 2018 the Business Alliance for Protecting the Pacific Coast (BAPPC) has served as the leading business voice opposing new and expanded oil and gas development off the Pacific Coast. Along the West Coast, offshore drilling threatens nearly 746,000 jobs and nearly $53 billion in GDP. Any expansion of offshore drilling would pose an unacceptable and unnecessary risk to our nation's robust ocean economies, businesses, and the lifestyles of our customers and employees.

The Pacific coast economy (California’s alone is the sixth largest in the world), is inextricably tied to clean coastal waters and beaches, as well as a stable climate. The Pacific coast boasts some of the most spectacular coastal areas in the world. Residents and people from all over the world – over 150 million visitors annually – come here to fish, hike, kayak, surf, wine and dine, and enjoy our beaches. Our region’s coastal economy contributes over 650,000 jobs and $54 billion annually to the nation’s economy. Ocean-based recreation and tourism alone contribute almost $24 billion annually to the GDP, and in California provide more jobs than any other state in the country. Meanwhile, commercial and recreational fisheries on the Pacific coast are valued at billions of dollars and deliver healthy and sustainable seafood for millions of people. All of
this far outweighs any potential jobs or economic gains that could ever be provided by offshore fossil fuel production.

Drilling increases the likelihood of a devastating oil spill, which can shut down fisheries, close beachside businesses, and deter campers and tourists from visiting our beautiful coastline. California, Oregon, and Washington have, in fact, taken positions to intentionally forgo any revenue from new offshore oil and gas development for over 50 years due to the unacceptably high risk, and has instead focused on developing clean renewable energy.

More than 90 West Coast municipalities have formally opposed drilling off their coast along with all 3 coastal governors and thousands of businesses. Please ask the President to formally withdraw his plan and vote yes on H.R. 1941 and H.R. 205. After all these years, it is time to permanently protect our coastal resources and ocean economies from the risks of offshore drilling.

Sincerely,

Pacific Coast Federation of Fisherman’s Associations – on behalf of 750 West Coast fishing families and companies
