

THANK YOU

for signing our petition to
stop dangerous seismic airgun blasting in the Atlantic.

Our oceans need your voice, now more than ever.

It is **critically important** that the Trump administration
also hears from you directly.

Please submit a personal comment directly by emailing
Jolie Harrison, Chief, Permits and Conservation Division,
Office of Protected Resources, National Marine Fisheries
Service

via

ITP.Laws@noaa.gov

Tell the administration why YOU oppose seismic airgun
blasting in our Atlantic.

Tell Pres. Trump why YOU Oppose Seismic Airgun Blasting:

- Proposed seismic surveys could injure as many as **138,000 marine mammals**, and disturb millions more.
 - Seismic airguns are *dangerously* loud and blast non-stop for weeks to months on end.
 - Seismic airgun blasting has been known to scare away valuable fish populations, and can harm endangered whales, dolphins, sea turtles, shellfish, crabs, and squid.
 - Seismic airgun blasting permits overlap, subjecting marine life to devastating blasts over and over again so multiple oil companies can have the same data – which the public will never see.
 - Blasting our oceans is a bad business deal: a healthy Atlantic supports nearly **1.4 million jobs and \$95 billion** in GDP.
 - Seismic airgun blasting is the first step to dirty and dangerous **offshore drilling**—leading to an industrialized coastline, chronic oil spills, and the looming threat of a BP *Deepwater Horizon*- like disaster.
-
