We strongly oppose the offshore Drilling Plan as it proposes to dramatically expand where offshore drilling can happen, including places where it has never happened, or where lease sales have not been held for decades.

This plan has nothing to do with helping the American people; this is simply another page out of the administration's shameless, multi-pronged playbook to sell off our public lands and waters to his Big Oil donors for cheap.

This plan is a massive giveaway to the oil industry. It threatens our coastal communities, economies, and environments just to pad fossil fuel CEOs' profits. It is entirely unnecessary, as the U.S. is already producing more oil than any nation in history. Additionally, Congress passed a law this year that already mandates 30 offshore oil and gas lease sales in the Gulf through 2040, and six in Cook Inlet, Alaska, through 2032.
