

July 16, 2015

The Honorable Nikki Haley  
Governor of South Carolina  
1205 Pendleton Street  
Columbia, SC 29201

Dear Governor Haley,

The Fripp Island Property Owners Association Board of Directors, on behalf of our 2,167 members; 969 of whom are South Carolina residents, would like to express our opposition to the Bureau of Ocean Energy Management's issuance of permits for offshore seismic testing and drilling for oil and gas reserves off the Eastern Atlantic Coast.

After polling our property owners, we have determined that the majority believe offshore drilling and gas development could devastate our pristine coastal environment and tourism industry.

From previous disasters, we know that an oil spill can devastate both the environment and economies of coastal states. Seismic testing, Offshore oil and gas exploration and development create a host of detrimental long term effects on the environment, including impacts to fisheries, estuaries, wetlands, marine mammals, turtles, shellfish and seabirds.

We believe it makes no sense to conduct tests when the local communities affected will have no say in the decision to move forward. We respectfully request that the Bureau of Ocean Energy Management abandon their plans to explore Off Shore Drilling along our Coastline.

Sincerely,

A handwritten signature in black ink, appearing to read "Richard C. Raible".

Richard C. Raible  
President
